

Person ID	Problem	App/Website found [name]/None	Likes	Don't likes	Improvements
1	Trouble with building habits	Streak App	<p>1. The app sends notifications multiple times a day.</p> <p>2. Users can share their streaks/tasks with others, allowing them to join in and participate in the same activity.</p> <p>3. The app also integrates with the Shortcuts app on the iPhone. When the user completes a task, they have the option to open a specific app as a reward. For instance, they can listen to motivational music or participate in a fun activity.</p>	<p>1. To use the app, payment of \$4.99 is required.</p> <p>2. There are no free trials or web version available.</p>	<p>1. The user interface is very simple.</p> <p>2. There is no instructional video to guide users on how to use the app, so it would be helpful to provide some tutorial.</p> <p>3. Additionally, there is no website version available.</p>
2	Keep track of work hours.	Hours Tracker App	<p>1. Employees can record their work hours by clocking in at their workplace.</p> <p>2. The job entry system also has</p>	<p>1. Free edition: You can track up to three jobs with 21 days of time entries.</p> <p>2. The personal plan allows for up</p>	There is no website to check the work hours.

			location awareness functionality. If a person is working at multiple jobs, they can clock in, and the hours will be logged for the specific work location.	to 5 jobs and unlimited entries. 3. The Pro Edition is priced at \$14.99 and offers unlimited jobs.	
3	Digital Journaling app	Day One App	<p>1. Able to record texts and photos.</p> <p>2. Tag people, time, and location.</p> <p>3. iCloud backup.</p>	<p>1. Paid (\$2.92/month, billed annually).</p> <p>2. Limited Free version: Provides access to 1 journal with 1 photo per day.</p> <p>3. No access to video and audio recording.</p>	<p>1. There is no website to access the data.</p> <p>2. Users must rely on the app.</p>
4	Budgeting app	Mint	1. Users can keep track of their income and expenses.	<p>1. Missing debt tracking function.</p> <p>2a. The user wants an app that can calculate the monthly payment based on their current APR (Annual Percentage Rate) and desired debt payoff timeline. For example, at a 21.99% APR, with a monthly payment of \$250, the debt will be</p>	1. Have debt tracking functionality.

				<p>paid off in 1 year and 2 months.</p> <p>2b. Or determine how long it will take to get out of debt based on their monthly payment amount. For example, if the user wants to pay off their debt in 1 year with a 21.99% APR, they will need to make a monthly payment of \$260.</p>
